

#### QSFP-4X10GE-LR-25-PRO

Juniper Networks® QSFP-4X10GE-LR-25 Compatible TAA Compliant 40GBase-PLR4 QSFP+ Transceiver (SMF, 1310nm, 25km, DOM, 0 to 70C, MPO)

#### **Features**

- SFF-8436 Compliance
- MPO Connector
- Commercial Temperature 0 to 70 Celsius
- Single-mode Fiber
- Hot Pluggable
- Excellent ESD Protection
- Metal with Lower EMI
- RoHS Compliant and Lead Free

### **Applications:**

- 40GBase Ethernet
- Access and Enterprise

#### **Product Description**

This Juniper Networks® QSFP-4X10GE-LR-25 compatible QSFP+ transceiver provides 40GBase-PLR4 throughput up to 25km over single-mode fiber (SMF) using a wavelength of 1310nm via an MPO connector. It is guaranteed to be 100% compatible with the equivalent Juniper Networks® transceiver. This easy to install, hot swappable transceiver has been programmed, uniquely serialized and data-traffic and application tested to ensure that it will initialize and perform identically. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters. This transceiver is Trade Agreements Act (TAA) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

Proline's transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products.

## **Absolute Maximum Ratings**

| Parameter                  | Symbol | Min. | Тур.    | Max. | Unit |
|----------------------------|--------|------|---------|------|------|
| Maximum Supply Voltage     | Vcc    | -0.5 |         | 4.0  | V    |
| Storage Temperature        | TS     | -40  |         | 85   | °C   |
| Operating Case Temperature | Тор    | 0    | 25      | 70   | °C   |
| Relative Humidity          | RH     | 5    |         | 95   | %    |
| Data Rate Per Channel      |        |      | 10.3125 | 11.2 | Gb/s |

### **Electrical Characteristics**

| Parameter                        |                      | Symbol    | Min.  | Тур. | Max.    | Unit  | Notes |
|----------------------------------|----------------------|-----------|-------|------|---------|-------|-------|
| Supply Voltage                   |                      | Vcc       | 3.135 | 3.3  | 3.465   | V     |       |
| Module Supply Current            |                      | Icc       |       |      | 1100    | mA    |       |
| Power Dissipation                |                      | PD        |       |      | 3500    | mW    |       |

| TX_FAULT                         | Normal Operation     | VOL       | 0     |      | 0.8     | V     |       |
|                                  | Transmitter Disable  | VIH       | 2.0   |      | VCCHOST | V     |       |
| TX DISABLE                       | Transmitter Enable   | VIL       | 0     |      | 0.8     | V     |       |
| Receiver                         |                      |           |       |      |         |       |       |
| Output Differen                  | ntial Impedance      | ZO        |       | 100  |         | Ω     |       |
| Differential Data Output Swing   |                      | VOUT, P-P | 300   |      | 850     | mVP-P | 1     |
| Data Output Rise Time, Fall Time |                      | tr, tf    | 28    |      |         | ps    | 2     |
| RX_LOS                           | Loss of Signal (LOS) | VOH       | 2.0   |      | VCCHOST | V     | 3     |
|                                  | Normal Operation     | VOL       | 0     |      | 0.8     | V     | 3     |

### Notes:

- 1. Internally AC coupled but requires an external  $100\Omega$  differential load termination.
- 2. 20 80 %.
- 3. LOS is an open collector output. Should be pulled up with  $4.7k\Omega$  on the host board.

|     |           | · ·  |       |

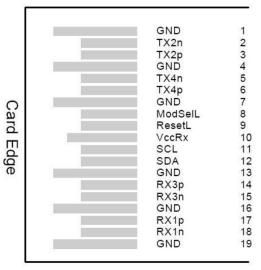

### **Notes:**

- $1\cdot$  The module signal grounds are isolated from the module case.
- <sup>2.</sup> This is an open collector/drain output that on the host board requires a 4.7KΩ to 10KΩ pull-up resistor to VccHost.

## **Recommended Application Interface Block Diagram**

# **Mechanical Specifications**

**Attention:** To minimize MPO connection induced reflections, an MPO receptacle with 8-degree angled end-face is utilized for this product. A female MPO connector with 8-degree end-face should be used with this product as illustrated in below Figure.

#### **About Us:**

Proline Options is one of North America's leading providers of transceivers and high speed cabling. With a reputation for quality, tested products that cover the connectivity spectrum, Proline Options has a solution for you regardless of the specification.

At Proline Options, every product is tested in its intended application - never batch or spec tested only. We run bandwidth, distance and IOS network tests. We have documented an impressive 0.03% failure rate over the last 10 years. To continue this rate of success we invest millions annually in our own on-site testing lab.
